Explanation of colour identification of cartridges, irritant- and active agent

WADIE Blank Cartridges / Effect Cartridges

Cartridges for signalling and shooting of pyrotechnic ammunition.

WADIE CS Cartridges

Irritant: CS (Ortho-Chlorbenzylidenmalondinitril)

Cartridges for signalling and self-defence.

Possible effects on persons when using WADIE CS Cartridges:

Uncomfortable, acute and involuntary effects such as stinging of eyes and nose, flow of tears, coughing, sneezing, nausea, difficulty of breathing, irritation and burning sensation of skin.

WADIE CN Gas-Cartridges

Irritant: CN (Chloracetophenon) known as "Teargas".

Cartridges for signalling and self-defence.

Possible effects on persons when using WADIE Tear Gas Cartridges CN:

Uncomfortable, acute and involuntary effects such as stinging of eyes and nose, extrem flow of tears, sneezing, nausea, difficulty of breathing, extremely irritation and burning sensation of skin.

WADIE PV active Pepper Cartridges

Irritant: Nonivamid, active agent, technical.

Cartridges for signalling and self-defence.

Possible effects on animals when using WADIE PV Pepper Cartridges:

Unpleasant, immediate and involuntary effects such as irritation of eyes, snout (nose) and muzzle (mouth) after direct fire on the animal. Difficulty breathing and vomiting can also result.

In Germany exclusively for animal protection!

SUPRA = increased quantity of active agent / irritant according to standard cartridge

All the effects depend only on the concentration of the active agent / irritant. The given specification is not binding.

Regulations of gun laws must be observed. Errors and misprints are reserved.
